

Industrial automation / IT-specialist

We are recruiting for an Industrial automation / IT-specialist to make a difference in our team.

As the automation / IT-specialist, you will deal with the infrastructure of the factory and you are involved in engineering activities. You will be accountable for the Factory Technical network and related components. This includes Data-, WIFI- and PLC-network, switches and routers and includes virtualization (VM) and interfaces to and from the factory of Verkade in Zaandam.

For the engineering part, you will work on the design, management and programming of industrial automation applications.

You will be processing and following up on Factory related disturbances and includes onsite support in Zaandam. Furthermore, you will be play an important role during the project-phase by participating as a team member in Engineering Projects and coordinating Infra projects.

If you are highly analytical with strong mainly Infra and IT technical knowledge and project delivery skills.

If you have sound knowledge of and experience in coordinating activities (project management-skills).

This might be the challenge for you!

Your responsibilities

- Understanding of network and infrastructural architecture, including high level knowledge of security standards.
- Support the IS / IT / DMO Manager EU in ensuring investments meets the strategic priorities of the business
- Handle and support the solution for (complex) IT tickets as forwarded by the IT service desk, within the agreed SLA's
- Ensure that factory infrastructure projects have been defined and prioritized, ensure scope & benefits are understood and managed within overall budget, quality and timeliness to meet business expectations
- Control the delivery of infrastructure services and support from third party service providers
- Responsible for the requirements, design, management and configuration of industrial automation applications;
- Participation as an IA engineer in various projects but also acting as a technical supervisor during the execution;
- Creating Java oriented adjustments, visualizations, equipment, Process Flow Charts and configuring the MES toolbox
- Responsible for drawing up and adapting functional and technical designs and compiling project documentation.
- Responsible for the setup of System Acceptance Test and Factory Acceptance Test when purchasing or commissioning installations
- Monitoring and further developing the vision and architecture of the IA within Verkade Together with your IA colleagues
- implement small modifications and support them in the event of complex malfunctions within the field of IA

Must haves

- Completed HBO education or equivalent in IT and / or industrial automation;
- 5+ years' experience working in IT and engineering
- 2+ years' experience working in IS
- Work experience in an industrial automation environment
- Understand current Infrastructure and IT technologies and service management
- ITIL knowledge and experience
- Experienced in installation, configuration and maintenance of network components, under which: Data-, PLC-, WIFI- and DECT-network, switches, routers and interfaces
- Knowledge of modern PLC programming languages, e.g. PC Worcx Phoenix, Rockwell, Siemens, Diaz;
- Excellent administration & documentation skills
- Realizing targets by taking responsibility and showing drive to deliver, combined with a pro-active attitude
- Excellent communication skills, able to facilitate functional or cross functional initiatives, chair workshops, able to translate the opportunities of technical solutions to the business audience

What we offer

This role offers a unique opportunity to work for an international FMCG company with strong international brands. The business culture is informal, with focus on teamwork and results. You will be part of an international and enthusiastic team and will be in direct contact with other departments. The responsibilities are divers and there are opportunities for development and growth.

Pladis/Koninklijke Verkade

Royal Verkade was founded in 1886 in Zaandam. A typically Dutch quality biscuit company in an international environment. Koninklijke Verkade has the ambition to be the most appreciated brand manufacturer, with the Verkade and Sultana brands. Around 700 ambitious and motivated employees enjoy working every day on the strong market positions of our brands within the biscuits, snack and chocolate categories. With this we meet the daily needs of consumers and customers. Sustainability and efficiency are important pillars in this. Koninklijke Verkade and BN are part of Yildiz Holding since 2014. Yildiz Holding, CEEMEA's largest food company, has brought its biscuit and chocolate business together under a new global company: pladis (www.pladisglobal.com). pladis is a global leader in biscuits and confectionery with operations in 120 countries in Europe, the Middle East, Africa, Asia and America. Pladis includes 36 factories in 13 countries with over 23,000 employees. In pursuit of "we promise happiness to the world with every bite", the organization enriches consumers with products in sweet and savory biscuits, waffles, cakes, chocolate, chewing gum and candy

We know that by mixing different ingredients, you can get a true taste explosion! At Verkade, we welcome everyone with equal enthusiasm - regardless of origin, skin colour, age, gender, sexual orientation, nationality or handicap - to create the most diverse flavour pallet there is.
